

ADVANCED TECHNOLOGY OF PLASTICITY 1987

Proceedings of the 2nd International Conference on the Technology of Plasticity, Stuttgart,
August 24/28, 1987

Edited by K. Lange for Arbeitsgemeinschaft Umformtechnik

Volumes I and II

Springer Verlag, 1987

TABLE OF CONTENTS

Volume I

Opening Address

Machine Tools and Flexible Manufacturing Systems State of the Art and Outlook to the Future

B. Leibinger XVII

Steels for Engineering Applications Present State and Trends

H. J. Engell XXI

Development Trends in Bodywork Manufacture with the Focus on New Technologies and
Materials

W. Jacobi XXXI

Papers

Fundamentals: Bulk Forming

Keynote Paper: Mathematical Modelling of Metal Forming Processes by Numerical Methods

O. Mahrenholtz, N.L. Dung 3

Plasticity by Boundary Elements

I. Potrc, A. Aluievic, P. Les 11

The Flow Stress of Metals in Warm Forming

Z. Marciniak, A. Konieezny 17

A Plastomechanical Model of the Transfer of Surface Roughness from Tool to Workpiece

O. Pawelski, W. Rasp, L. Loffler 23

Keynote Paper: Combined Physical and Numerical Modelling of Metal Forming Processes

T. Wanheim, J. Danckert 29

Application of Boundary Element Method to Cold Forging Die Design,.

Y. Ocheare, R. Wadabayashi 37

Influence of the Boundary Conditions on Results of the Finite-Element-Simulation

R. Kopp, M.L. Cho 43

Numerical Applications of a Strain-Space Represented Plasticity

D. Besdo 51

Finite Element Analysis of Flattening of Surface Asperities by Rigid Dies in Metal Working Processes

A. Makmouche, H. Ike, M. Murakawa, N. Koga, L.F. Ciupik 59

Development of Constitutive Equations for Metals at High Temperatures

E. Steck 67

Benchmark Test on a Plastic Deformation Problem

Application of numerical methods of analysis to the uniaxial tension of a block or cylindrical bar with both ends fixed

T. Jimma, Y. Tomita, S. Shimamura 73

Tools

Keynote Paper: New Manufacturing Processes of Metal Forming Tools

T. Nakagawa 83

Wear and Life of Blanking Tool Made of Ceramic Materials - Shearing of Amorphous Alloy Foil

I. Aoki, K. Suzuki, T. Nakagawa 91

Stress Relaxation in the Prestressed Dies for Cold Forging

C. Kortenski, M. Marinov, G. Pushev 99

Experiences with PVD Coatings on Cold Forming Tools

J. Vogel 103

CAD/CAE

Keynote Paper: CAD/CAM - A State of the Art in Metal Forging Industry

W. Thompson 111

Computer-Aided Engineering in Bulk Metal Forming - Selected Examples

W. Voelkner, J. Leopold 125

CIM Concept and Forming Technology

J. Triouleyre 133

A Blanking Die CAD System on Microcomputer

X. Ruan, X. Zeng, L. Wang Y. Li 139

A CAD/CAM System for Deep-Drawing Processes

M. Tisza 145

New Processes and CAD System for Cold Roll Forming of Bending Sheet Parts

A. Neubauer, S. Klaeger, H.J. Angrabeit, A. Eichhorn, U. Kahle 153

Integration of CAD/CAM/CAE in an Aerospace Forging Company

Kh. Hoang-Vu, D.W. Birch 161

Bending

Stationary Sheet Bending Straightening

W. Brekelmans, S.M. Hoogenboom 171

Wrinkling in Out-of-Plane Bending of Elastic-Plastic Circular Plates Subjected to Radial Edge Moments

K. Naruse 177

Springback of Clad Sheet Metals in Uniform Stretch Bending under Plane Strain Condition

F. Yoshida, R. Yagi, M. Ohmori 185

Analysis of Springback in Sheet Forming Operation

S.C. Tang 193

On the Strain Distribution in Die Bending of Heavy, Wide, Hot Rolled Steel Plate

M.L. Oliver, K.J. Weinmann 199

Roll Forming for Widely Ranging Thickness Diameter Ratio ERW Pipes

Y. Kuriyama, M. Ataka, Y. Watanabe, T. Nagao 207

Effect of Hydrostatic Stress on Bending Limit of Aluminium Alloys

M. Shinohara 215

Determination of Residual Stresses of the First Order in Deep-Drawn and Bent Workpieces at Different Forming Conditions

E. v. Finckenstein, U. Preckel 223

Investigation of the Behaviour of Coated Thin Sheet Metal During Forming by Bending

E. v. Finckenstein, H. Brox 233

Development of Dieless Bending of Non-Circular Steel Pipes

K. Kobatake, T. Ichise, H. Sekiguchi, K. Osakada 239

Finite Element Simulation of Bending-Restriking Process of Steel Sheets

Y. Nagai, A. Makinouchi 247

Flexible Automated Sheet-Metal Working

H. Klingel 255

The Working Limits Caused by Lateral Buckling for In-Plane Bending of Strips

Sh. Sakaki 265

Working Quality and Technological Aspects of Laser Cutting of Sheet Metals

R. Nuss, M. Geiger 273

Blanking/Piercing

The Mechanism of Ductile Fracture during Transverse Shearing

S. Dzikowski 283

Precision Blanking of Electronic Machine Parts

T. Jimma, F. Sekine, K. Sekiya 291

Piercing of Gray Cast Iron Tube for Two-Cycle Engine Cylinder Liners

T. Koike, H. Yamagata 299

Combined Effects of Hydrostatic Pressure and Punching Speed on Blanking Behaviours of 2S-Aluminium

M. Itoh, F. Yoshida, M. Inoue, M. Ohmori 307

Materials Engineering

Keynote Paper: Constitutive Laws for Strain-, Strainrate- and Temperature Sensitive Metals

E. Steck 315

High Speed Blanking of an Amorphous Alloy

Y. Murakoshi, T. Sano, T. Takahashi, M. Terasaki, K. Matsuno, H. Takeishi
323

Deformation-, Temperature- and Time-Induced Phase-Transformation of Two High Alloyed Tool Steels

H. Schrader, P. Funke, H.-D. Kunze 329

Effects of Ion Implantation on Mechanical Properties of Metals and its Application to Plastic Working

H. Hayashi, M. Iwaki, K. Kawashima, T. Fujihana 335

The Influence of Texture and Microstructure on Superplasticity of Ti-6AL4V

B. Bai 343

Development of Dieless Drawing Process

H. Sekiguchi, K. Kobatake, K. Osakada 347

An Adverse Effect of Contact Pressure in Cold Pressure Welding

H. Kudo, K. Nakamura, M. Tsubouchi, Y. Matsumoto 355

Investigations on the Superplastic Behaviour of the Titanium Alloys TiAl 6 V4 an TiAl 5 Fe 2.5 (Rod Material)

U. Zwicker, J. Breme, W. Lehnen 363

Testing of Materials:

Keynote Paper: Interaction of Surface Microstructure and Lubricant in Metal Forming Tribology

H. Kudo, A. Azushima 373

Prediction of Ductile Failure in Forming

P.J. Bolt, J.A.G. Kals, J.H. Dautzenberg 385

Stresses in Tension-Test Bars after Multi-Pass Drawing of ETPC Copper

E.G. Thomsen 393

A New Method for Assessing the Deformability of Sheet Material Comes Back to the Question: Is Uniform Elongation a Valid Term?

H.P. Liebig, R. Beyer 399

On the Surface Integrity of Mechanically and Thermally Worked Metal Plates

A.G. Mamalis, G.C. Vosniakos, N.M. Vaxevanidis 407

Improved Press-Formability and Strengthening of A 2024 Sheet By Thermomechanical Treatment

T. Mori, N. Kawai 415

The Effect of Strain Path on the FLD of Coated Steel Sheet

J.Z. Gronostaiski , W. J. Al i, M .S. Ghattas 423

Importance of Deformation-Induced Heating to Sheet Formability

R.H. Wagoner 429

Effects of the Friction and Deformation Path on Stretch-Formability of Sheet Metal

B. Devedzic, M. Stefanovic 437

The Effects of Temperature and Speed on the Shearing Characteristics of Sheet Materials

M. Murakawa, K. Nishigaki, N. Koga, K. Ohkawa 445

The Use of Cold Workability Test Results to Predict FLC as a Function of Stress State

V. Vujovic, M. Plancak, D. Vilotic, A.H. Shabaik 453

The Plastic Response of a Mild Steel under Biaxial Loading Conditions

S.K. Samanta, G. Ardash 461

Extrusion

Keynote Paper State of the Art and Development Trends in Cold Forging Technology

R. Geiger 469

Pressure Distribution over Tool Surfaces in Cold Forging

Sh. Sheliaskov 479

Combined Extrusion of SiC Whisker/Al-Zn Air-Atomized Powder Composites

H. Asanuma, M. Hirohashi, E. Kawai 487

Metal Flow in the Rod Extrusion of Rate Sensitive Materials

N. Kanetake, K. Lange 493

A New Production Method for Automobile Starter Clutch Housings

B. Yonchev 499

Numerical Simulation of Extrusion of Fin-Tubes and Fin-Bars

M. Kiuchi, S. I-i-jima 507

Coupled Viscoplastic Flow and Conductive-Convective Heat Transfer during Hot Extrusion

C. Teodosiu 515

Finite Element Analysis of Non-Symmetric Extrusion Using some Experimental Results

K. Kato, T. Okada, T. Murota, H. Itoh 523

Flexible Press System for Multiple Metal Forming Processes

Th. Grabener 531

Experimental and Theoretical Determination of Container

X.W. Wang, H.G. Chang, C.J. Wang, W.Y. Lee 539

Tribo-Forming of Thin-Wall Cup with Effective Stick Friction

T. Nakamura 545

Central Bursting in Extrusion of Inhomogeneous Materials

M. Ayada, T. Higashino, K. Mori 553

Thermal Analysis for Backward Cold Extrusion of Steel Taken Blue Brittleness into Consideration

T. Kato, J. Tozawa, K. Shinagawa 559

Localization and Dead Metal Zones in Warm Extrusion

K.H. Becker, C. Sailer, H. Lippmann, E. Teubl 565

Possibilities and Limitations of Cold Extrusion Processes Combined with Radial Extrusion

W. Osen 575

Improvement of the Extrudability of α - and $(\alpha+\beta)$ -Brass by Grain Refinement and Properties in the as Extruded Conditions

J. Breme 583

Design of Extrusion Punches with Irregular Geometries

K. Lange, T.C. Vu 589

Influence of Metal Forming Parameters on the Fatigue Behaviour of Extruded Shafts

W. Schwab, B. Hager 597

Residual Stresses in Axisymmetrically Formed Products

C.S. Hartley 605

Process-Simulation (Sheet)

Keynote-Paper: Review of Practical Modelling Methods for Sheet Metal Forming

J.L. Duncan, R. Sowerby 615

A Finite Element Modelling of the Punch Press Forming of Sheet Metal

E. Nakamachi 625

Simulation of the Forming Process for Irregularly Shaped Autobody Panels

P. Hora, T.C. Vu, P.M. Wollrab, J. Reissner 623

Analysis and Design of Flange Deformation in Deep Drawing of General Noncircular Cups

D. Y. Yang., W.J. Chung, Y.Y. Cha, Y.J. Kim 641

Process Modelling of Rotary Tube Cutting-off

P. Bariani, A. Tiziani 649

Finite Element Simulation of Deep-Drawing of Low and High Strength Steel

K. Mattiasson, M. Saran, A. Melander, E. Schedin, C. Gustafsson 657

Simulation of Deep-Drawing Processes with Special Regard to Circular and Rectangular Cups

A.W. Behrens 665

Application the Combined Euler-Lagrange-Method for Mathematical Modelling of Pipe-Angle Forming Process

G. Krallics, J. Looms, P. Tamas 673

Elastic-Plastic FEM Analysis of Bending of Elastically Supported Plate

N. Hatada, M. Ueda, K. Ueno 679

Volume II

Stretching, Ironing, Spinning

Deformation and Formability in Bore-Expanding of Metal Sheets from the Aspect of Anisotropic Yield Characteristics

Y. Kurosaki, M. Matsumoto 689

Simulation of Sheared Edge Behaviour in Stretch Flanging by a Modified Fukui Test

Z. Milosevic, F. Moussy 697

An Improvement in Ironing of Deep Drawn Cans

K. Miyauchi, T. Aoki 703

Roller Pass Programming in Conventional Spinning by NC Spinning Machine

K. Kawai, M. Hayama 711

A Finite Element Modelling for Deep Drawing of Thin Sheet in Automotive Industry

E. Massoni, M. Bellet, J.L. Chenot, J.M. Detraux, C. de Baynast 719

Influence of Plastic Anisotropy on Deformation of Thin-Walled Tubes in Bulge Forming

S. Fuchizawa 727

Influence of a Surface Defect on the Stretch Formability of Sheet Metals

T. Hiroi, H. Nishimura 733

New Formula for Calculating the Coefficient of Limit in Hole Flanging

W. Chen, D. Zheng, Sh. Yao 741

A Contribution to Deep Drawing with Simultaneous Ironing of very Thin Sheet Material

H. Wolf, L. Rotz, G. Effenberger 745

Rolling

Mashy-State Rolling of Composite Sheets

M. Kiuchi, S. Sugiyama 753

The Upper Bound Solution for Three-Dimensional Deformation in Roll Forging of Blank

Ch. Zhang, Y. Tai, G. Ren 759

New Approach for Predicting Ring Rolling Procedure

P. Boucly, J. Oudin, Y. Ravalard 765

Rheological interpretation to Prevent Faults Observed in Products on Ring Rolling Process

Y. Maekawa, T. Hirai, T. Katayama, J.B. Hawkyard 773

Study on Bending-Rolling Combined Forming Technique

Y. He, W. Chen, F. Zhang 781

Solid Phase Roll Cladding of Bimetallic Strip by Cross Shear Cold Rolling

Q. Zhu 789

Mechanism of Polygonning Formation of Tube Bore in Stretch Reducing

Y. Sodani, T. Hirakawa, Y. Mihara 795

New Control System for Ringrolling

R. Kopp, U. Koppers, H. Wiegels 803

CAD Application in Forge Rolling

K. Kuzmann, M. Pirtovsek 809

Simulation of Ring Rolling Process

E. Doege, M. Aboutour 817

Drawing (bar, wires, tubes)

Keynote Paper: The influence of Strain Path on Wire Properties

P. Huml 827

Finite Element Analysis of the Shear Strain in the Axisymmetric Drawing

M. Pietrzyk, J. Luksza, L. Sadok 835

Simulation of Drawing-Processes by the Finite Element Method

J. Gerhardt, A.E. Tekkaya 841

Wire Drawing at Elevated Temperatures: Experimental and Theoretical Comparison

N. H. Loh, D.H. Sansome 849

Cup-Shaped Defect in Copper Wires Drawn from Rods of Continuous Casting and Rolling

K. Yoshida, H. Tanaka 857

Experimental Mechanics of Shaped Bar Drawing

R.N. Wright, P.B. Martine, Y. Yi 863

Tribology

Keynote Paper: Friction Laws in Metal Forming Tribology

J. A. Schey 873

A Model for the Characterization of Friction Resistance to Sliding as a Function of Load, Speed and Viscosity and Geometry

B. Avitzur 883

The Push-Drawn-Test, a New Method for Determination of Friction Coefficient on Condition of Plastic Deformation

O. Pawelski, W. Rasp, U. Mohr 889

Adhesion Strength of Phosphate Coatings in Cold Forming

H. Y. Oei 893

Effect of Tool Workpiece Contact Length on Friction Coefficient in Metal Forming

S. Shima, N. Yamamoto 901

Flattening of Rough Expanding of Plastically Deformed Bulk Loaded with a Flat and Hard Plate

L.F. Ciupik, H. Ike, A. Makinouchi, J. Mstowski 909

A Friction and Lubrication Test for Cold Forging

N. Bay, B.E. Christopherson 917

Lubrication in Isothermal Forging with Ceramic Dies

K. Osakada, M. Shiraishi 925

Press Joining of Especially Coated Steel and Aluminium Sheets

H.P. Liebig, R. Beyer 933

Powder Metal Forming

Keynote Paper: Generation of Metal Products with New Properties by Combined Powder Metallurgy and Deformation Processes

W.J. Huppmann, V. Arnhold 943

Modelling of Aluminium Alloy Powder Hot Forging Process in View of Computer Aided Design (CAD) of Preform

C. Levallant, J.L. Querbes, C. Laugee, P. Amouroux 953

Application of the Finite Element Method to P/M Forming Processes

S.I. Oh, W.T. Wu, J.J. Park 961

New Yield Function for Forming Processes of Porous Materials

J. Duszyk 969

A Modified Slip-Line Field Theory for Sintered Porous Metals

Sh. El Wakil 977

Forging

Keynote Paper: State of the Art and Trends in Hot Forging

H. Meyer-Nolkemper 987

Simulation and Limit State in Metal Forming

G. Ziaja, L. Cser, Z. Darvas 999

Numerical Method for Plastic Working Processes in Three Dimensions

T. Wada, T. Nanba 1005

A Criterion for Ductile Fracture in Cold Forging

N.L. Dung, O. Mahranholtz 1013

Keynote Paper: Process Simulation of Hot Die Forging Processes

T. Altan 1021

An Analysis of Void Crushing during Flat Die Free Forging

M. Tanaka, S. Ono, M. Tsuneno, T. Iwadate 1035

Computer-Aided Roll Forging

B. Kaftanoglu, A. Nassirharand 1043

Thermo-Mechanical Finite Element Calculation of Throe-Dimensional Hot Forging with Remeshing

J.P. Cescutti, N. Soyris, G. Surdon, J.L. Chanot 1051

Analysis of the Closing and Consolidation of Internal Cavities in Heavy Rotor Forgings by Finite Element Method

J. Sun, H. Guo 1059

Finite Element Modelling of a Radial Forging Process

T. Rodic, B. Stok, F. Goligranc, D. Owen 1065

Improved Properties of Forged Superalloys - Results of a Better Modelling and Controlling of the Forging Process

G. Schroder, H. Rydstad, G.H. Gessinger 1073

Metal Flow and Tool Stress in Cold Forging of Gear Components

F. Dohmann, O. Traudt 1081

Investigation into Forming Processes of Various Spur Gears

K. Kondo, K. Ohga, K. Hori 1089

Simulation of Plane Strain H - Shape Forging Using Non-FEM Method

M. Abebe 1097

Finite Element Simulation of Metal Flow around Round Corner of Tool

K. Mori, K. Osakada, T. Iada, M. Fukuda 1105

Material Influences on Plastic Flow Localization and Instability in Metal Processing

W.R. Steinhurst, B.F. von Turkovich 1111

NC-Radial-Forging - Present State of Further Development

A. Wohr, K. Lange 1119

Problems of Introducing FMC in Forging

Y.A. Bocharov 1133

Fundamentals: Sheet Forming

Keynote Paper: State of the Art of Sheet Metal Forming and Future Trends

W. Panknin 1143

Mechanics of Drawing with Rubber Pads

M. Holznar, V. Mannl 1151

Deep-Drawing of Shells with Bi-Level Bottoms

T. Jimma, T. Kuwabara 1159

Deformation Mechanism in a Dual Phase Steel

F. Moussy 1165

Initiation of Buckling in Anisotropic Metal Sheet

A.M. Szacinski, P.F. Thomson 1171

State of Development in the Forming of Thick Sheet Metal

D. Schmoackal, E. Bohm 1179

Process Simulation and Adaptive Control in Sheet Metal Forming

E. v. Finckenstein, M. Kleiner 1187

Production of Small Batch Quantities Employing Flexible Production Systems in Metal Forming

R. Kellenbenz, H. Hoffmann 1195

Tooling Concepts for Large Transfer Presses A Quantum Leap in Production Technology of Large Automotive Body Panels

M. Brautigam 1203

Process-Simulation (Bulk)

Keynote-Paper: Process Design in Metal Forming by the Finite Element Method

S. Kobayashi 1213

Physical Simulation for Metal Forming with Strain Rate Sensitive Model Material

A. Azushima, H. Kudo 1221

Multi-Level Simulation of Metal Forming Processes

R. Kopp, M.L. Cho, M. de Souza 1229

Modelling of Free Large Processes by Photo-Electric Scanning Moire Method

Q. Cao, S. Ye, B. Xie, Y. Zhong 1235

Materials Modelling and Intrinsic Workability for Simulation of Bulk Deformation

J.S. Gunasekera, H.L. Gegel, J.C. Malas, S.M. Doraivelu, J.M. Alexander 1243

Drawing (Sheet)

Keynote Paper: Interactions between Cold Rolled Sheet Steel and Forming Process

Ch. Straßburger, K. Bliemel, W. Prange, 1253

Simulation of the Buckling Phenomenon in Sheet Metal Forming by a Test on Flat Circular Specimens

Z. Milosevic, C. Botte, F. Moussy 1261

FEM Simulation of Surface Roughening and its Effects on Forming Limit in Stretching of Aluminium Sheets

K. Yamaguchi, N. Takakura, M. Fukada 1267

Effect of Forming Temperature on the Deep Drawability of Aluminium Alloy Sheets

M. Sugamata, J. Kaneko, M. Suruki, H. Usagawa 1275

Temperature Dependency of Mechanical Properties of Steel Sheets and its Application to Deep Drawing in Warm Condition

T. Ohwue, H. Takechi, Y. Furuno 1283

Earing and Delayed Cracking of Deep-Drawn Cup of Austentic Stainless Steel Sheets

H. Sumitomo 1289

An Improvement in Deep Drawability of Steel/Plastic Laminate Sheets by Control of Blank Holding Force

K. Manabe, H. Hamano, H. Nishimura 1297

Blank-Holder Pressure and Blank-Holder Layout in Deep Drawing of Thin Sheet Metal

E. Doege, N. Sommer 1305

Extrusion Augmented Drawing - A New Technique for Forming Protrusion

C.B. Cowley, J. Dransfield 1315

Improvement of Tooth Profile Accuracy in Finish Gear Rolling of Helical Gears

T. Ozaki 1319

A New Cladding Process Combining Bulge Forming and Squeeze Casting

T. Dendo, T. Shirota, S. Kojima 1327

Investigations of the "Grob" Cold Shape-Rolling Process

N. Kurz 1335

Superplasticity and Grain Boundary Relaxation in High Carbon Tool Steel

Ch. Kortensky, N. Mitev, I. Spirov, N. Dyulgerov 1343

Theoretical Prediction on Non-Axisymmetric Buckling in Tube Nosing

J. Endo, K. Kato, T. Murota, N. Hatada 1347
