

# Table of Contents

## VOLUME I

### Plenary Session I

#### *Keynote Paper*

**Metal Forming - a Key Technology for Automobile Production**  
K.-D. Vöhringer 3

#### *Keynote Paper*

**25 Years German Metal Forming Association - Driving Force of Research and Development**  
K. Lange 13

### Plenary Session II

#### *Keynote Paper*

**Simulation of Metal Forming Processes - Applications and Future Trends**  
T. Altan, W. Thomas, V. Vazquez, M. Koc 23

#### *Keynote Paper*

**Improvement of Product Accuracy in Cold Die Forging**  
K. Kondo 41

#### *Keynote Paper*

**Examples on European Industrial Research on Bulk Metal Forming**  
N. Bay, T. Wanheim, B.G. Ravn, M. Arentoft 49

#### *Keynote Paper*

**Innovative Metal Forming Processes to Manufacture Future Sheet Metal Products**  
R. Kopp, O. Dürr 69

### Quality & Economy

#### *Invited Paper*

**Economical Significance of Metal Forming Processes**  
M. Hirschvogel 83

#### *Invited Paper*

**Technology Fusion in Metal Forming Field**  
M. Kiuchi 85

#### *Invited Paper*

**Business Unit as General Contractor**  
A. Stalmann 95

**Standardised Product Data Representation for the Metal Forming Industries**  
D.J. Mynors, N. Swindells, A.N. Bramley 105

**Application of Control Figure on Quality Management System**  
F. Pan, Y. He, J. Han 111

## **Knowledge Engineering**

### *Invited Paper*

- Integration of Numerical Modelling and Knowledge Based Systems in Metal Forming**  
M. Tisza 117
- Invited Paper*
- Process State Monitoring Based on Data Mining in Hot Rolling**  
L. Cser, A.S. Korhonen, O. Simula, P. Ruha 129
- Computer-Aided Process Planning for Non-axisymmetric Hot Forging Products Using a Constraint Blackboard**  
T. Ohashi, M. Motomura 137
- Optimal Blank Design Through an Inverse Identification Approach**  
N. Alberti, R. Di Lorenzo, L. Fratini 143
- Development of Computer Integrated System Supporting Design of Process and Dies of Multiple Stage Forging Processes**  
D.Y. Yang, Y.T. Im, Y.K. Lee, C.H. Lee, C.H. Park, J.H. Song, Y.S. Lee, E.G. Yoh, J.H. Kim, K.K. Hong, J.H. Kim, S.R. Suh, J.H. Khang 149
- The Prediction of Geometrical Configuration and Ductile Fracture Using the Artificial Neural Network for a Cold Forged Product**  
D.J. Kim, B.M. Kim 155

## **Machine Tools I**

### *Invited Paper*

- Economic Manufacturing of Large Body Parts with New Press Technology**  
E. Harsch, B. Viehweger 163
- Recent Process Developments and Press Type Criteria**  
A. Strauch, E. Körner 171
- Pliable Blank Holder Systems for the Optimisation of Process Conditions in Deep Drawing**  
E. Doege, L.-E. Elend, C. Ropers 177
- Development of Set-up System for 12-High Cluster Type Rolling Mill**  
N. Nishiura, F. Fujita, R. Yagi, N. Suzuki, S. Murata 183
- Research on Multi-Point Forming of Three-Dimensional Sheet Metal Parts**  
M. Li, C. Liu, Q.Chen 189
- CNC Strategy in Technology of Plasticity**  
Yu. Bocharov 195

## **Machine Tools II**

### *Invited Paper*

- Press Concept for the Future in Precision Forging**  
E. Doege, R. Bohnsack 203
- Integration of Advanced Engineering with New Production Machinery for Net Shape Cold Forming**  
K.-H. Weiß, R.J. Schilling, J.W. Carper 211

<b>State of the Art and Survey of Large Automatic Forging Presses in Japan</b>	221
A. Baba, J. Nishikawa, Y. Kawashima	
<b>Implementation of Metal Forming Analysis in the Design of Forging Machines</b>	227
F.H. Osman, J. Ferreira	
<b>Strike Characteristics of Double-strike Screw Presses</b>	231
P. Li, S. Li, G. Hu, Y. Liu, Z. Yang	
<b>An Integrated Tool Design System in Collaboration with the Displacement Adjustment of Forging Machine</b>	235
J.-J. Sheu	
<b><u>Tools I</u></b>	
<i>Invited Paper</i>	
<b>Optimisation of Life Performance and Net-Shape Capability of Cold-Forging Tools through Minimisation of Micro-Plastic Phenomena</b>	243
J. Groenbaek, T. Birker, T.O. Pedersen	
<b>Optimal Prestressing of Cold Forging Dies</b>	253
T. Rodic, I. Gresovnik, M. Hänsel, M. Meidert	
<b>Damage and Fracture Analysis of Extrusion Dies by Local Approach with Continuum Damage Mechanics</b>	259
K. Hayakawa, T. Nakamura, S. Tanaka	
<b>Controlled Wear as Mechanism for the Design of Geometrically Defined Nanometric Surface Structures on Forming Tools</b>	265
K. Steinhoff, A. Kapoor, N. Guillon	
<b>Improved Fatigue Strength of Cold Forging Tools by Surface and Coating Technologies</b>	271
Ch. Hinsel, M. Celeghini, U. Engel, M. Geiger	
<b><u>Tools II</u></b>	
<i>Invited Paper</i>	
<b>On Performance and Strength of Metal Forming Tools Subjected to Local Plastic Strains under Loading</b>	281
A. Kocanda	
<b>The Feasibility of Using Approximate Tooling Profiles in the Simulation of Cold Forging</b>	291
D.J. Mynors, J.M. Crookes, D. Garner, J. Hankers, A.N. Bramley	
<b>Computer Aided Preforming Tool Shape Design in Hot Forging</b>	297
L. Fourment, D. Vieilledent	
<b>A Progressive Dies' Structure CAD System Based on the Function-Oriented Assembly Design Environment</b>	303
Z.Q. Sheng, X.Z. Xiao, J.Y. Wen, J.J. Li	
<b>The Development of a Die Design Support System for Aluminum Extrusion</b>	309
K.E. Nilsen, H.J.J. Kals, F.J.A.M. van Houten, T.H.J. Vaneker	

## **Tribology Modelling**

<b>Tool/Workpiece Interface Interaction and Its Influence on Metal Forming Processes</b> Z.M. Hu, V. Pornbenjapakkul, T. A. Dean	317
<b>FE-Process-Simulation of Cold Forging Processes with Adaptive Friction Factors</b> A. Behrens, H. Schafstall	323
<b>Mechanical Modelling of Friction and Wear</b> H. Gläser, H. Wulf	329
<b>Examination of Tribological Tool Load in Cold Forging and Fine Blanking with the Finite Element Analysis</b> F. Klocke, H.-W. Raedt	335
<b>Application of Computer Technology to Select and Create Lubricants for Plastic Deformation Processes</b> N.P. Barykin, V.I. Semenov, A.Kh. Kildibaeva	341
<b>Identification of Tribological Parameters during Upsetting Tests Using Inverse Analysis with a 2D Finite Element Code</b> B. Boyer, E. Massoni	347

## **Tribology Testing**

### ***Invited Paper***

<b>Frictional Study of Uncoated Steel Sheets</b> A. Wihlborg, R. Crafoord	355
<b>A New Friction Test Using Simple Upsetting and Flow Analysis</b> X. Tan, W. Zhang, N. Bay	365
<b>Measurement of 3D Oil Film Thickness at the Interface between Die and Workpiece in Lubricated Upsetting by means of Newly Developed Fluorescence Technique</b> A. Azushima, J. Miyamoto	371
<b>Evaluation of Cold Forging Lubricants under Realistic Forging Temperature Conditions</b> H. Saiki, G. Ngaile, L. Ruan, Y. Marumo	377
<b>Development of Environmentally Friendly Lubricant with High Performance and Simple Treatment for Cold Forging</b> M. Takeuchi, F. Ikesue, N. Kashimura	383
<b>Three-Dimension Analysis of Contact Stress Measurements in Forming Processes</b> F.H. Osman, F. Potel, M.S. Loveday	391

## **Materials**

### ***Invited Paper***

<b>Development of a Low Carbon Hardened Steel for Hot, Cold and Warm Forging Applications</b> V. Ollilainen, E. Hocksell	399
<b><i>Invited Paper</i></b> <b>Innovation Potential of Materials and Their Impacts on Processing in Forming Technology</b> J. Reissner	409

<b><i>Invited Paper</i></b>	
<b>Bulk Mechanical Alloying for Processing of Functional Materials</b>	
T. Aizawa	419
<b>Research on Recrystallization of SWRH-82B High during High Strain Rate</b>	
P. Yumei, C. Qingwu, T. Di, Z. Yuzhou, M. Zhenli	429
<b>Analysis of the Impact Behavior of Interstitial Free (IF) Steels with Special Emphasis on Cold Work Embrittlement</b>	
A. Spalek, G. Reisner, E.A. Werner	435
<b><u>Metallurgy</u></b>	
<b>Effect of Carbon Content on Deformation Behaviour of Carbon Steels in the Austenite Temperature Range</b>	
C. Nagasaki, J. Kihara	443
<b>Optimization of the Hot Flat Rolling by its Modelling at the Laboratory Mill Tandem</b>	
I. Schindler, M. Radina, T. Kubina, F. Kure, A. Silbernagel, L. Cizek	449
<b>Fabrication of Refractory Metal Silicides and Aluminides from Mechanical Alloyed Precursor</b>	
M. Suzuki, T. Aizawa	455
<b>Precipitation, Strain Hardening and Softening during Hot and Warm Rolling of Microalloyed Steels</b>	
S. Küsters, H. Langner, W. Bleck	461
<b>Deformation Behavior and Resulting Microstructure Development of Microalloyed Steels Deformed in the Two-phase Region</b>	
J. Majta, A.K. Zurek	467
<b>Experimental Research of Tertiary Recrystallization in Grain Oriented Silicon Steel Produced by Cross Shear Rolling</b>	
K. Qi, X. Gao, T. Wang, H. He, R. Li	473
<b><u>Modelling &amp; Simulation I</u></b>	
<b><i>Invited Paper</i></b>	
<b>Future Perspectives and Limits for the Mathematical Modelling of Metal Forming Processes in Automotive Industry</b>	
H.-J. Haepf, K. Roll	481
<b><i>Keynote Paper</i></b>	
<b>Recent Progresses in Optimal Design of Metal Forming Processes through Numerical Simulation</b>	
J.C. Gelin, O. Ghouati	489
<b><i>Invited Paper</i></b>	
<b>Constitutive Modelling for Simulation in Forming Technology</b>	
K. Wegener	497
<b>Process-oriented FEM Forming Simulation</b>	
J. Leihkauf, G. Obieglo	507
<b>UBET Using the Stream Function and a New Element for This Technique</b>	
T. Shimizu, T. Sano	513

## **Modelling & Simulation II**

### ***Invited Paper***

- Automatic Mesh Generation and Remeshing for Finite Element Analyses of 3D Bulk Forming Processes**  
D.Y. Yang, Y.K. Lee 521
- Invited Paper***  
**Material Laws and Elements for Sheet Metal Forming Simulations**  
D. Besdo 533
- Invited Paper***  
**The Increasing Requirements on Empirical Data for Use in Metalforming Process Simulation Packages**  
T.A. Dean, Z.M. Hu 541
- 3D Finite Element Analysis of Radial Forging Using Process Frame Approach**  
T. Rodic, O. Wensel, A. Pristovsek 551
- Simulation of Metal Deformation Induced by Differential Heating**  
F.H. Osman, M. Hua, J. Graeff, Y.F. Guo 557

## **Ecological Manufacturing**

### ***Special Seminar organized in cooperation with the ICEM International Committee on Environment and Manufacturing***

#### ***Keynote Paper***

- Steps Towards Sustainable Manufacturing in Automotive Plants - State of the Art and Future Challenges with the View on Technology, Economy and Ecology**  
W. Pollmann 563

#### ***Keynote Paper***

- Metal Forming and Global Environment**  
T.Sano, A. de Winter 569
- Research Trend of the Environmental Production Technology Innovation**  
K. Nakajima, Y. Tsuchida, T. Inoue 577
- 'Provens, Possibles and Probables' of Cascading in Metal Processing**  
A. de Winter, J. Quakernaat 583
- Reduction of Environmental Impact Attained by Magnesium Alloys for Automotive Components**  
T. Sano, A. de Winter, T. Saiki, S. Horikoshi, S. Fuchizawa, S. Sado 589
- Estimation of Energy Consumption in Steel Forging Process**  
K. Kubo, H. Sekiguchi, Y. Nakamaru, S. Kuromatsu 595
- Environmental-Friendly PIM Technique Using Supercritical CO<sub>2</sub>**  
T. Shimizu, A. Kitazima, T. Sano 601
- Manufacturing of Magnesium by Turning and Burnishing Operations**  
H.K. Tönshoff, B. Karpuschewski, J. Winkler, C. Podolsky 607
- Local Collar Developed by Metal Plastic Deformation**  
T. Iura, K. Mori, K. Yamamoto, Y. Aono, K. Kurita, O. Nakamura, T. Sano 613

<b>Towards Optimized Lubrication by Micro Texturing of Tool Surfaces</b> Th. Neudecker, U. Popp, T. Schraml, U. Engel, M. Geiger	619
<b>Lubricant Reduction in Aluminium Deep Drawing by Means of Tool Coatings or Lubricating Primers</b> P.J. Bolt, R.P. Schaake	627
<b>Deep Drawing of Sheet Metal with Hydraulic Counter Pressure and Vibration Using Volatile Lubricant</b> S. Kataoka, M. Murata	633
<b>Application of Thermo-Mechanical Control Process (TMCP) to Ecological Issues</b> Y. Tsuchida, T. Inoue, K. Nakajima, Y. Hosoi	637

## **PAPERS ACCOMPANYING POSTER PRESENTATIONS**

### **Bending, Spinning, Rolling & Roll Forming**

<b>Plate Bending of Spherical Tank</b> B. Grizelj	643
<b>Effects of Compressive Forces on Axial Direction in Tube Spinning</b> R. Muta, M. Murata	645
<b>Features and Peculiarities at Deformation in the Two-phase-region</b> L. Chabbi, W. Lehnert	651
<b>Finite Element Analysis for Roll Forming of Tubes and Channels</b> N. Kim, J. Kim	653

### **Deep Drawing**

<b>Dimensional Inaccuracy in Drawing Process of Aluminium Alloy Sheets</b> S. Bac, F. Stachowicz	657
<b>A Study of the Effects on the Dynamic Explicit Analysis of Autobody Panel Stamping Processes by using the Faster Punch Velocity and the Mass Scaling Scheme</b> D.W. Jung, D.Y. Yang	659
<b>3D FE Simulation of Square Cup Deep Drawing</b> D. Malgyn, Gy. Krallics, K. Kardos	661
<b>Simulation of Springback Effect during Stretching</b> Ö. Szabadits, Gy. Krallics, D. Malgyn	663
<b>Experiences with Expert Systems for Process Planning of Deep Drawing</b> M. Tisza jr.	665
<b>Effect of Hot-Rolling Processing Parameters on Deep-Drawing Properties of Hot-Rolled Interstitial-Free (IF) Steel</b> Z.C. Wang, X.J. Guan, X.J. Wang, Z.R. Wang	669

### **Extrusion & Drawing**

<b>Modelling of Extrusion Processes based on Asymptotic Velocity Fields</b> S. Alexandrov, G. Mishuris, W. Miszuris, R. Sliwa	673
--	-----

<b><i>Technological Lubricants for Wet Drawing of Brass-coated Wire</i></b>	
N.P. Barykin, V.I. Semenov, A.Kh. Kildibaeva, L.Sh. Shuster	675
<b><i>Extrusion with Changing Cross Section Shape of Tube</i></b>	
K. Hasegawa, M. Murata	677
<b><i>Contribution of Finite Element Analysis Approach to Backward Extrusion</i></b>	
M. Math, B. Jerbic, S. Mahovic	681
<b><u>Forging</u></b>	
<b><i>Analysis of Circumferential Forces Acting during Rotary Forging Process</i></b>	
T. Balawender, F. Stachowicz	685
<b><i>Warm Compression of Aluminum Alloy Axisymmetric Rings</i></b>	
C. Borsellino, F. Micari, V.F. Ruisi	687
<b><i>3D Forging Simulation of Components for Aircraft Applications</i></b>	
W. Horvath, G. Weber	689
<b><i>Possibilities of FEM Simulation by Large Crankshaft Production</i></b>	
B. Masek, Z. Novy, D. Kesner	691
<b><u>Materials</u></b>	
<b><i>Combinatorial Method of Analysis of Non-linear Properties of Structural-Mechanical Models of Materials</i></b>	
N. Barykin, A. Galimov	695
<b><i>Modern Method for Investigating Normalised Condition of Steel Wide Strips</i></b>	
Z. Csepeli, G. Kralik, J. Lorinczi	697
<b><i>Development and Prospects on Crack Healing of Metal</i></b>	
J. Han, D. Wei, H. Hu, Y. He	699
<b><i>Analysis of Plastic Deformation on the Basis the Grain Microdeformation</i></b>	
S. Randjelovic, V. Stoiljkovic	701
<b><i>On Evolutional Constitutive Equations Construction for the Finite Deformations</i></b>	
A. Rogovoy, R. Novokshanov	703
<b><i>Effect of Microstructure on the Mechanical Behavior of Aluminum Alloys</i></b>	
N. Solomon, I. Solomon	709
<b><i>Serrated Behaviour of Al-Mg Sheet in In-plane Stressing</i></b>	
M. Yoshimizu, H. Ohsawa	711
<b><u>Tools &amp; Machine Tools</u></b>	
<b><i>Experimental and Numerical Evaluation of Different Powder Metallurgical Steels for Cold Forging Tools</i></b>	
B. Falk, U. Engel, M. Geiger	715
<b><i>Development of Control Systems for the Blank-holding Action in Sheet Metal Forming</i></b>	
C. Garcia, F. Le Maitre	717
<b><i>A New Approach In Die Set's Design</i></b>	
A. Kocov, J. Lazarev	719
