

# METAL DEFORMATION PROCESSES

## Friction and Lubrication

Edited by John A. Schey - University of Illinois

Marcel Dekker Inc., New York, 1970

### CONTENTS

Preface v

Notation Recent Symbols viii

#### **1. Background and System of Approach**

John A. Schey 1

1.1 Historical Background 1

1.2 System of Discussion 8

References 11

#### **2. Friction Effects in Metalworking Processes**

John A. Schey 15

2.1 Plastic Flow and Interface Friction 17

2.2 Rolling 22

2.3 Drawing of Wire, Bar, and Tube 37

2.4 Extrusion 47

2.5 Forging 58

2.6 Sheet Metal Working Processes 68

2.7 Summary 74

References 77

#### **3. Friction, Lubrication, and Wear Mechanisms**

Charles H. Riesz 83

3.1 Definitions 84

3.2 Friction 85

3.3 Wear 102

3.4 Lubrication 109

3.5 Summary 134

References 136

#### **4. Lubricants**

Charles H. Riesz 143

4.1 Introduction 144

4.2 Lubricant Types 145

4.3 Emulsions 204

4.4 Conversion Coatings 212

4.5 Surface Preparation 217

4.6 Lubricant Removal and Waste Treatment 221

4.7 Health and Hygiene 226

4.8 Summary 228

References 231

#### **5. Lubricant Properties and Their Measurements**

John A. Schey 241

5.1 Attributes of Metalworking Lubricants 242

5.2 Measurement of Friction 246

5.3 Measurement of Lubricant Film Thickness 295

5.4 Measurement of Deformation Patterns 297

5.5 Measurement of Wear 298

5.6 Surface Finish and Surface Preparation 300

5.7 Measurement of Temperature 311

5.8 Staining Propensity and Corrosion 317

5.9 Lubricant Composition and Technological Properties 320

5.10 Summary 322

References 324

## **6. Rolling Lubrication**

John A. Schey 333

6.1 Introduction 334

6.2 Friction and Lubrication Effects 335

6.3 Rolling Lubricants 377

6.4 Lubricants for Ferrous Materials 387

6.5 Aluminum Rolling Lubricants 420

6.6 Copper and Brass Rolling Lubricants 437

6.7 Titanium Rolling Lubricants 441

6.8 Refractory Metal Alloy Lubricants 444

6.9 Other Metals 445

6.10 Summary 446

References 448

## **7. Wire Drawing Lubrication**

John A. Newnham 457

7.1 Introduction 458

7.2 Friction and Lubrication Effects 458

7.3 Lubricant Types 502

7.4 Lubrication of Ferrous Materials 513

7.5 Lubrication of Aluminum and Its Alloys 522

7.6 Lubrication of Copper and Its Alloys 524

7.7 Titanium and Its Alloys 527

7.8 Other Materials 529

7.9 Summary 533

References 535

## **8. Hot Extrusion Lubrication**

Serope Kalpakjian 549

8.1 Introduction	550
8.2 Friction and Lubrication Effects	552
8.3 Lubricant Types	569
8.4 Lubricants for Ferrous Materials	581
8.5 Lubricants for Light Metals	583
8.6 Lubricants for Copper and Brass	585
8.7 Lubricants for Titanium and Its Alloys	585
8.8 Lubricants for Nickel- and Cobalt-base Alloys	587
8.9 Lubricants for Refractory Metal Alloys	588
8.10 Lubricants for Other Metals	590
8.11 Lubricants for High Energy Rate Hot Extrusion	591
8.12 Summary	592
References	593

## **9. Forging Lubrication**

Serope Kalpakjian 603

9.1 Introduction	604
9.2 Friction and Lubrication Effects	605
9.3 Cold and Warm Forging Lubricants	628
9.4 Hot Forging Lubricants	629
9.5 Lubricants for Steels and Stainless Steels	633
9.6 Light Metals and Their Alloys	639
9.7 Copper and Its Alloys	648
9.8 Titanium and Its Alloys	650
9.9 Nickel- and Cobalt-base Alloys	651
9.10 Refractory Metal Alloys	651
9.11 Summary	653
References	654

## **10. Cold Forging and Cold Extrusion Lubrication**

John A. Newnham . 661

10.1 Introduction 662

10.2 Friction and Lubrication Effects 664

10.3 Lubricants for Cold Extrusion 675

10.4 Lubrication of Carbon and Low Alloy Steels 677

10.5 Lubricants for Stainless Steels 688

10.6 Lubricants for Aluminum and Its Alloys 689

10.7 Lubricants for Copper and Its Alloys 693

10.8 Lubricants for Titanium and Its Alloys 694

10.9 Lubricants for Other Metals 696

10.10 Summary 697

References 698

## **11. Sheet Metal Working Lubrication**

John A. Newnham 703

11.1 Introduction 704

11.2 Friction and Lubrication Effects 705

11.3 Lubricant Types for Sheet Forming 728

11.4 Lubricants for Steel Forming 734

11.5 Lubricants for Stainless Steel 745

11.6 Lubricants for Copper and Its Alloys 748

11.7 Lubricants for Aluminum and Its Alloys 751

11.8 Lubricants for Titanium and Its Alloys 753

11.9 Lubricants for Other Sheet Metals 758

11.10 Summary 762

References 763

Appendix-Definitions and Conversions 771
